

# Intrexx empowers companies to manage their *digitalization* in one place

Unify data from various sources, digitize workflows, and develop custom applications at a rapid pace. Thanks to Low-Code and the power of Intrexx.

Create applications in no time with our **Low-Code platform**.

Your departments can also develop their own applications

Applicant management

Customer service and support

Invoice management

Internal communication

Contract management

Customer management

Phone book and calendar

Automated shift planning

Endless possibilities ↗

Intrexx Applications

Applications can be accessed across the entire organization.

INTRANET  
EXTRANET

User management

Intrexx ships with an advanced permission management. Allowing you to securely share data with selected individuals and groups.

Visitor registration

Event planning

Partner portal

Applications can also be made accessible to external individuals or service providers.

## Design **automated workflows** with just a few clicks.

By leveraging prebuilt logic blocks, analog processes are transformed into digital workflows and can be directly integrated with your applications.

Contract data is modified

Generation of the latest PDFs

Automatic dispatch to all participants

Instant archiving

Always customized ↗

Intrexx **doesn't create data silos** but connects to your existing systems.

Consume data from different sources and make it available in your Intrexx applications. Intrexx can also be used as an interface between different data sources and software solutions.

### Made in Germany

Intrexx is developed, hosted, and distributed in Germany. Our 85+ employees also help customers develop applications in cooperation.

### Relieving your IT

More than 60% of the applications developed in companies were created by professionals without IT knowledge. IT specialists can thus focus on complex tasks.

### Cloud and On-premise

Host Intrexx according to your requirements. The Intrexx Cloud is provided on German servers, but you can also use your own infrastructure.

# 1.2 million users in the DACH region work with Intrexx daily.

With more than 25 years of experience, our platform has proven reliable for all types of business processes.
