

Service Description

Expert-Time

What is it about?

Have a set number of appointments scheduled with Intrexx experts?

Our experts are available to assist you with a variety of topics, from technical challenges to project-related questions.

How does the Expert-Time work?

Regular coordination meetings

We will establish a series of regular meetings, held every two weeks and lasting at least half a day. Each meeting will begin with a one-hour session to discuss and prioritize the most important topics. We will then work on these topics in a focused manner.

Continuous Collaboration

Between scheduled meetings, you can submit topics as tickets via the [Intrexx Project Portal](#) at any time. These tickets can be accessed by any authorized team member. They will be discussed and prepared at the next meeting at the latest, and often resolved sooner.

Flexible Service Usage

Our services are designed to be flexible. Unused service time between appointments is accumulated and can be used in subsequent months. Please note that unused time during recurring appointments is considered used.

Budget control

Without your explicit consent, we will only use a maximum of one month's budget in advance. This ensures that you can effectively control your budgets.

Which **packages** are available to me?

Package S: 1 day of consulting per month with support from one of our consultants.
