

Service Description

Scoping-Workshop

What is it about?

Analysis, needs assessment, and project design.

In this workshop, we will delve deeply into your project. We will develop implementation strategies, create a project plan, and define relevant product features.

What's included?

Strategy Development:

- **Risk Identification and Problem Solving:** Our consultants identify potential risks and problems early on and develop initial solutions. This allows us to determine the optimal approach in the early stages of the project.
- **Solutions and Decision Making:** We present various solutions and clearly communicate their advantages and disadvantages to provide you with the best possible basis for your decision.

Project Planning:

- **Prioritization and Focus:** The project goals are prioritized and secondary issues are identified to ensure a smooth project flow.
- **Process Mapping:** Your internal processes are precisely documented and integrated into the development of the portal and applications.
- **Workload and Implementation:** A realistic estimate of the expected workload is made possible, increasing planning certainty for the client.

Product Definition:

- **Authorization and User Management Concept:** A concept tailored to your needs will be developed, including a detailed plan for navigating and structuring users, rights, and roles.
- **Expertise and Integration:** Our consulting team's extensive experience across various industries guarantees that Intrexx's capabilities are optimally utilized and external systems are effectively integrated.

What are the *advantages* of workshops with Intrexx experts?

Thanks to our consultants' extensive experience in product development and project management, you'll gain a complete overview of your project before you even begin.

Furthermore, the entire workshop will provide you with insights into our working methods and optimal project planning.
