

Service Description

Layout Implementation

What is it about?

We create individual layouts that are designed strictly according to your company's corporate identity (CI) guidelines.

What's included?

We implement your desired layouts, including adaptive ("responsive") designs. We also offer consulting services that empower you to make future adjustments yourself and develop new layouts independently.

What **benefits** do you get from uniform layouts?

- Strong user identification with your portal through corporate identity (CI) compliance.
 - Increased brand recognition through external users within an extranet.
 - Improved user satisfaction through modern and user-friendly layouts.
 - Optimized workflows through streamlined digital processes.
 - Ideal conditions for developing responsive applications.
 - Comprehensive support (360-degree support) without the need to build up in-house expertise.
-

What **advantages** do Intrexx experts offer?

- Accelerated project completion thanks to the extensive experience of our CSS and layout specialists.
 - Ensuring high quality standards in project execution.
 - Direct training and professional development for your employees by our experts.
-

How much **time** should I expect to spend?

Due to the modularity of Intrexx and our expertise, projects are often implemented within 1-2 days, depending on the complexity of your project.
