

Strong UI instead of user frustration:

How to make your portal user-friendly!

What is it about?

With a UI/UX refresh, we develop a clear strategy for a contemporary look and feel for your Intrexx portal.

Together, we analyze your existing portal layout, identify areas for improvement, and create a modern look and feel step by step, perfectly aligned with your corporate design. We pay particular attention to optimized usability, mobile compatibility, and accessibility. Our goal is not only to visually enhance your applications but also to make them more user-friendly and future-proof.

What's included?

Creation of a custom portal layout

- Visual design of all Intrexx elements (HTML & CSS) including definition of colors, fonts, and sizes
- Development of custom CSS classes to ensure efficient and consistent future application development
- Adaptation of the portal navigation to your requirements, optimized for desktop and mobile devices
- Integration of user-dependent views of key elements, for example, for anonymous visitors

Portal homepage optimization

- Revision or complete redesign of an attractive and user-friendly portal homepage
- Clear content structure and quick access points to key and popular applications

User-friendly application development

- Adaptation of existing applications for optimal display on mobile devices
- Systematic integration of new CSS classes to standardize and improve the user experience
- Precise optimization of operating concepts and general improvement of the interface (e.g., spacing, arrangement, and grouping)

Why is it worth to implement your project with our *Intrexx experts?*

User-friendliness is a key economic factor. Those who cut corners here sacrifice efficiency, user acceptance, and sustainable competitive advantages.

With a UI/UX refresh, we combine your requirements with our in-depth technical expertise gained from numerous successful Intrexx projects. Step by step, we tailor the appearance of your portal to your corporate design, optimize the display for mobile devices, and ensure barrier-free and intuitive usability. The result: An Intrexx portal that is not only visually appealing but, above all, functionally impressive, leading to lasting increases in efficiency and user satisfaction.
